DETAILED ACTION

This Office Action is in response to the Application filed June 29, 2006.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-14, drawn to a semiconductor device for emitting light.
Group II, claims 15-17, drawn to a method of adjusting the color of the light.

This application further contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- a. Species I, as shown in Fig. 4.
- b. Species II, as shown in Fig. 5.
- c. Species III, as shown in Fig. 6.
- d. Species IV, as shown in Fig. 7.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims

subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The groups and species listed above do not relate to a single general inventive concept under PCT Rule 13.1, because, under PCT Rule 13.2, the groups and species lack the same or corresponding special technical features for the following reasons: The common features as set forth in claim 1 do not show an inventive concept over the prior art as evidenced by Shields et al. (US 6,864,501), which shows all the limitations of claim 1.
